

FB Housing (fluid seal)

Advantages

- Positive sealing integrity in a side access bag-in/bag-out housing for fluid seal Absolute® filters
- Complete capture of airborne contaminants

Typical applications: Chemical manufacturing facilities, food processing, genetic research and biotechnology facilities, hospital isolation suites to prevent the spread of infectious diseases, industrial processes exhaust, microelectronic and semiconductor facilities, nuclear power plants, pharmaceutical facilities, radioisotope handling facilities, university research laboratories, US Department of Energy Facilities, veterinary research and animal disease laboratories, and specific United States Government and military facilities.

Construction: Containment level housing. See Product Sheet 3401 for construction details.

Filters: Fluid seal Absolute® filters or HEGA filters.

Additional data: Information shown herein for quick reference purposes only. Application specific data is required by the factory before model selection can be accomplished.

Consult factory or Product Sheet 3401 for more information.

Bounded and Loose Filled Carbon Panels

Housing Size (H x W)	Prefilter Depth (inches)	Primary Filter Depth (inches)	Housing Depth (inches)	Housing Height (inches)	Housing Width (inches)	Weight
